Discovery Center's multi-story atriums are filled with exhibits that invite visitors to open their minds to a greater understanding and appreciation of our world...past, present and future.

Highlights include:

- A theater simulation of the 1811-12 earthquakes that shaped the land in this region as well as a planetary tour in the starship theater.
- A 60-foot replica of a human body with a 30-foot slide.
- Dinosaurs, fossils, Native American artifacts, military equipment, vintage automobiles, and dozens more hands-on experiences for children.

*"Discovery Park is worth a visit. It has military, space, and historical exhibits and a replica of a late 1800 village. The park is reasonably priced and has many hands-on learning activities for children. Plan on spending a full day there. "*
